

## Bentley | *Continental GT + C*

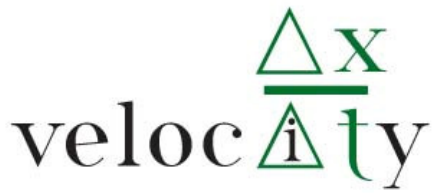

The Continental GT has been instrumental in redefining the sporting GT concept. Its impressive styling conveys power and grace. The unique W12 engine produces an inspiring sound but the standard exhaust system is too restrictive to fully appreciate the engine. Velocity have designed a Stage 1 system for the GT which is in keeping with the car's styling and image, but produces an inspiring and sporting tone that will turn heads, and have you relishing every burst of acceleration.

Velocity's performance exhaust system provides a gorgeous and beefy warble at lower RPMs which is refined enough for comfortable long distance travel and everyday use. As RPMs rise with wider throttle openings, the pitch and intensity gradually build to a distinctive W12 roar which will leave you grinning from ear to ear and craving more.

Manufactured entirely from aeronautical 304 grade austenitic stainless steel this system weighs just 20 kilos. The massive 12 kilo reduction improves braking, handling and acceleration. Like all of our systems, it is fully mandrel bent and backed by our 25-year guarantee and features a distinctive and sporting set of slash cut tips.

Velocity Is: The Rate of Change In Position. A Physical Quality. Both Speed and Direction are Required to Define it. The Absolute Value of Velocity is Speed.

## Bentley | *Continental GT + C*

- **Better sound!** Silky smooth W12 warble at lower RPMs, rising gradually to sound like nothing else on the road.

- **Less weight.** 12 kg lighter than a standard system, improving braking, handling and acceleration.

- **Bolt on fit** (easier to fit than the OEM exhaust)

- **Increased Performance.** More horsepower (dyno results awaited), smoother torque curve and sharper throttle response.

- **Heat dissipation** is vastly improved, reducing heat soak underfloor.

- **Quality British craftsmanship.** 304 grade mandrel-bent austenitic stainless steel with laser-cut flanges.

- **Choice of external styles.** This system can be fitted to the car with the original oval tail pipes or with our sleek slash cut quad tails. These are on a sleeve fit so you can choose how far you want them to point out of the bumper, they are also designed so you can easily stagger them or have them at the same length.

### Sound Levels:

This system is available in 1 configuration:

Stage 1: Sporting increase in sound at the top end, with a subtle and luxurious burble at lower RPMs. Comfortable and unobtrusive when cruising, with a roar to match the impressive performance at the top end.

Velocity Is: The Rate of Change In Position. A Physical Quality. Both Speed and Direction are Required to Define it. The Absolute Value of Velocity is Speed.
