

Ferrari 575

Exhaust

The Ferrari 575 encapsulates the concept of the Sporting GT, capable of mile-eating transcontinental cruising and in an instant, the performance and handling associated with the prancing horse on its bonnet. Though modern looking, its lines are classic and can unmistakably be traced to sporting GTs of years gone by – the 275 and even to the 250. Unfortunately modern Ferraris do not produce the volume and intensity of sound that their classic forbears did. Thankfully Velocity has produced an exhaust system which allows the 575 owner to experience the pleasure of a Ferrari V12 with a more sporting level of sound.

Velocity's performance exhaust system provides a subtle and beefy warble at lower RPMs which is refined enough for comfortable long distance travel and everyday use.

As RPMs rise with wider throttle openings, the pitch and intensity gradually build to unleash that unmistakable Ferrari V12 wail that will leave you grinning from ear to ear and driving with the windows down.

Manufactured entirely from aeronautical 304 grade austenitic stainless steel this system weighs 15 kilos less than the standard Ferrari unit. The massive weight reduction improves braking, handling and acceleration. This system is supplied fully polished, and backed by our 25-year guarantee.

Ferrari 575

ECU Tuning

By re-programming the cars ECU we can safely improve the power and drive of the Ferrari 575. There is a lot of potential in the 5.7 V12 engine that can now be unlocked to give your Aston a new lease of life.

Full Performance ECU re-programming session

Custom ECU remapping (chip tuning) can deliver stunning results transforming power delivery, throttle response, sound and transmission systems.
