

## Jaguar | XK 1996-2005

Sound is an important and emotional part of driving a sporting GT. In years gone by Jaguars had distinctive and evocative exhaust notes you could recognise in an instant. With vehicle manufacturers increasingly forced to meet global sound regulations, today's Jaguar does not provide as full a soundtrack as some drivers would like. Thankfully the team at Velocity has designed a performance system which provides the quality and intensity of sound that many XK drivers are looking for.

Velocity's performance exhaust system provides a silky smooth V8 purr at lower RPMs which is refined enough for comfortable long distance travel and everyday use. As RPMs rise with wider throttle openings, the pitch and intensity gradually build to a distinctive V8 wail that will leave you grinning from ear to ear and driving with the windows down.

Manufactured entirely from aeronautical 304 grade austenitic stainless steel this system weighs 8.0 kilos compared to the 12.0 Kilos of the OE boxes. Like all of our systems it is fully mandrel bent and backed by our 25-year guarantee.

## Jaguar | XK 1996-2005

- **Better sound!** Silky smooth V8 tickover at lower RPMs, rising gradually to sound like only a V8 can.
- **Less weight.** 4.0kg lighter than a standard system, improving braking, handling and acceleration.
- **Bolt on fit** (easier to fit than the OEM exhaust)
- **Increased Performance.** More horsepower (dyno results awaited), smoother torque curve and sharper throttle response.
- **Heat dissipation** is vastly improved, reducing heat soak under floor.
- **Quality British craftsmanship.** 304 grade mandrel-bent austenitic stainless steel.
